

Code
AF-OLF1

Discovery and initiation to olfaction
Introductory level

Trainer

Sensory experts

Location

Intra-company or within our laboratory

Capacity

Max 10 trainees

Duration

1 day (7 hours)

Training aims

Discovering the sense of smell
Initiation to the Odournet Odour descriptors methodology
Training on odour intensity rating and recognition of 6 to 10 olfactive references

Public

R&D, Formulation and Quality control technicians and engineers
No requisite training requirements

Learning resources

1 training dossier
1 Odournet Odour descriptors kit (6 to 10 references)

Assessment of learning outcome

Practical evaluation
Theoretical evaluation (questionnaire)

Content

Introduction to olfaction and odours (0,5 hours)

I have a global knowledge on odours properties and definition and olfaction mechanisms

- General presentation of sensory analysis and its interests
- Physiological and psychological mechanisms of perception and olfaction

Presentation of Odournet Odour descriptors methodology (0,5 hour)

I understand the Odour description methodology and referential used to structure the olfaction perception space

- Principle and usages of the methodology

Training on olfactive memorization and odour recognition (4 hours)

I can identify and describe up to 10 references and recognize them when incorporated into mixes

- About 10-15 references learnt gradually (references adapted to your industrial sector ISO)
- Recognition practical exercises

Initiation or revision to odour intensity evaluation and rating (1 hour)

I know the VDI 3882 part 1 intensity scale

Advice for learning retention (0,5 hour)

Evaluation of learning achievements (0,5 hour)

- Multiple Choice Questionnaire, practical cases and on the spot training evaluation

Certificate of attendance and certificate of training completion
